BASICS

Permissioning

/pə'miʃ(ə)n/

1. A system for, or process or result of, granting authorization.

Verb

permissioning

1. present participle of permission

Noun

permissioning

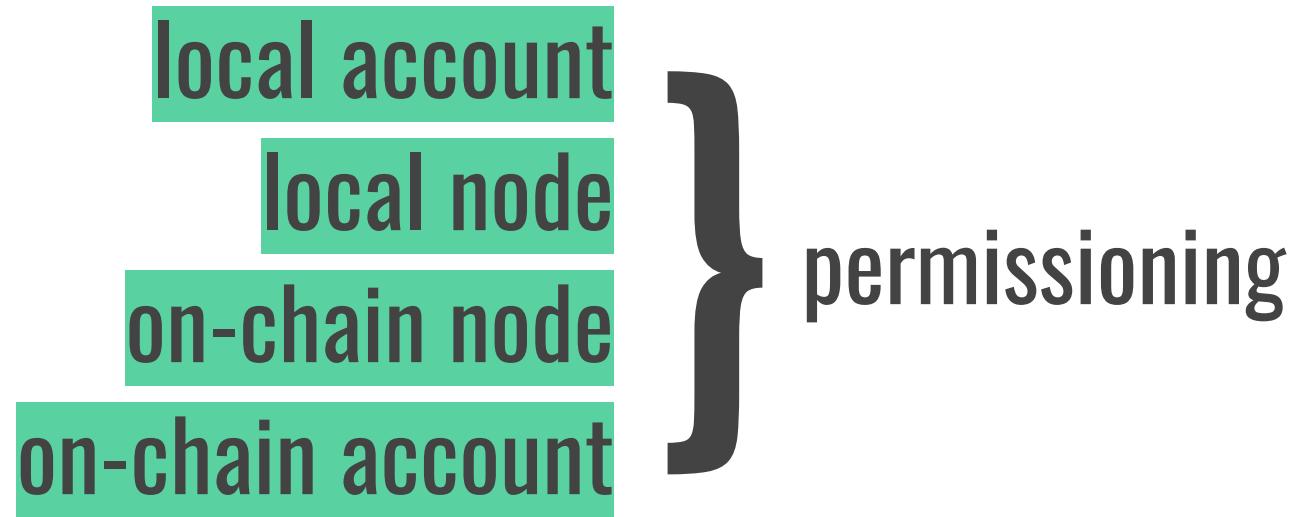

1. A system for, or process or result of, granting authorization.
2. (computing) flags or access control lists pertaining to a file that dictate who can access it, and how.

I used the "chmod" command to change the file's **permission**.

- Restrict usage of your resources
- Deny access to malicious actors
 - Restrict chain txs to known ids
 - Remove badly behaved servers
- restrict to servers run by known operators
- source identity verification requirements
 - Suspend access to account
 - Blacklist broken contracts
- allow the chain can be used by accounts
